## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Sato et al. 2001/0026072.

Regarding claim 1, Sato et al. 2001/0026072 discloses a carrier mounting structure comprising a carrier (40) provided in front of an engine compartment of a car body, that fixes electrical components of a car; a bumper cover (21) located below the carrier, that absorbs impact generated in a collision of the car; and a plurality of knobs (51a and 52a) extending from a lower surface of the carrier, and connected to the bumper cover; wherein the knobs are formed integrally with the carrier. It has been held that the term “integral” is sufficiently broad to embrace constructions united by such means as fastening and welding.

Regarding claim 2, Sato et al. 2001/0026072 discloses a carrier mounting structure, wherein each of the knobs has an L-shaped structure, and includes support protrusions that maintain the rigidity of the knobs.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The cited references show several other carrier mounting structures similar to that of the current invention.
